**Subject:** CFAC Phase I Site Characterization - Electrical Resistivity / IP Geophysical Survey Scope of Work(CDM Smith comments)  
**Attachments:** CFAC-Geophysical WP\_DRAFT Comments.docx

Good afternoon Mike,

Please see attached the comments to the draft geophysical work plan. . CDM Smith had no issues with their approach, but felt the document was lacking in rationale for data collection and transect locations. This is likely due to the fact that the work plan was prepared by the geophysics subcontractor. However, Roux should prepare some detailed data quality objectives and present rationale for the locations for insertion into the document. The SAP is very vague with respect to the geophysical survey also.

Feel free to contact either Sean or me.

Thank you,

Damon
